**PRESS RELEASE:**

## **Portable Engine Heater**

Top View

Keyser Manufacturing is now offering a 110V Aluminum Portable Engine Heater. This unit is designed to pre-heat the water system prior to engine start up by heating and circulating water through the entire cooling system and engine block.

To connect the engine heater to your cooling system, use the Aluminum Coolant Check Valve. This valve will ensure directional water flow through the entire system. The lightweight design will fit current radiator plumbing as well as the Portable Engine Heater.

**PART#: 100 16600 (Portable Engine Heater)**  
**100 16600-1 (Check Valve)**

Keyser Manufacturing is a "total solutions provider" of racing products and components, offering the latest in technology and design.

Coolant Check Valve
